A NEW HISTORY OF LIFE, A REVIEW HALF WAY THROUGH (4.5 GA to 0.3 GA)
GA = billion years ago. PW= Peter Ward, author. This book is not light reading. It should be a graduate text book. It presupposes the reader has detailed knowledge in the fields of chemistry, physics, biology, botany, geology, paleontology, as well as a working vocabulary in 5-10 syllabic

A New History of Life: The Radical New Discoveries about ...

About A New History of Life. An estimated 4.6 billion years ago, the Earth and Moon were formed in a violent impact. On this, many agree, and even more that a long time after that, life began. However, few know that the first life on the Earth may not have emerged on this planet, but could, in fact, have begun on Mars, brought here by meteorites. In this revolutionary book, leading scientists Peter Ward and Joe Kirschvink rewrite the principal account of the history of life on Earth.

A New History of Life: The Radical New Discoveries about ...

A New History of Life is a natural history that stands out because of its large timescale (4.567 billion years, to be precise) and broad intended audience. Overall, it delivers on the promise of its title adjective, describing new findings and hypotheses

A New History of Life offers a provocative new account, based on the latest scientific research, of how life on our planet evolved--the first major new synthesis for general readers in two decades. Charles Darwin's theories, first published more than 150 years ago, still set the paradigm of how we understand the evolution of life--but scientific advances of recent decades have radically altered that understanding.

A New History of Life: The Radical New Discoveries about ...

Recent investigations hint at episodes in the history of life on Earth that rival the most imaginative movies. For example: Could our planet have been seeded with life from elsewhere? Did the development of life create conditions that threatened to poison the biosphere? How have natural forces conspired, over and over, to remove

A New History of Life by Stuart Sutherland

A New History of Life offers a provocative new account, based on the latest scientific research, of how life on our planet evolved--the first major new synthesis for general readers in two decades. Charles Darwin's theories, first published more than 150 years ago, form the backbone of how we understand the history of the Earth.

A New History of Life: The Radical New Discoveries about ...

A New History of Life tells this all-embracing story of life on Earth—its origins, extinctions, and evolutions—in 36 lavishly illustrated lectures that assume no background in science. At half an hour per lecture, you cover the entire 4.54-billion-year history of Earth in 18 hours, averaging 70,000 years per second!

A New History of Life | The Great Courses

For decades research on extinctions has been focussed on the effects of catastrophic meteorite impacts. In "A New History of Life", Peter Ward, introduces another possible cause - bacteria and their influence on ecosystems and climate by releasing or absorbing various gases or chemicals which can lead to shifts in earth's climate.
