The installation of automatic control equipment is discussed in RP 550, Part I, Section 5. Because transmission systems are discussed in RP 550, Part I, Section 7, temperature transmission is only discussed briefly in this section. Custody transfer temperature C measurement is covered in Chapter 7 of APT's Manual of Petroleum Measurement Standards.

API 550 A/B Initially released in 1971, the 550A EQ utilizes API's legendary custom 2520 op-amp to achieve a very musical sound. The 550A features three bands of EQ, with 21 selectable frequencies. Each band can cut or boost up to 12 dB in two dB increments.

API 550a balanced input Avedis claims the re-issues are electronically balanced utilising surface mount parts in a 2510, with a fet input ic op-amp. API has prided themselves in "discrete", and while keeping it pretty secret, seriously modify the 550a. And to top it off, keep the old designation.

Modeled on the late 1960's legend, the API 550A EQ provides reciprocal and repeatable equalization at 15 points in 5 steps of boost, divided into three overlapping ranges. Its high and low frequency ranges are individually selectable as either peaking or shelving, and a band-pass filter can be inserted independently of all other settings.
