To write your blood pressure out, you record the systolic pressure over the diastolic pressure, so that it looks like a fraction e.g. 120/80 mm Hg. This means that the systolic blood pressure was 120 mm Hg and the diastolic was 80 mm Hg. Task Find the ranges of blood pressures for the normotensive state, and mild, moderate and severe hypertension.

*The Cardiovascular System - Teesside University*

12.4 Names and function of the main blood vessels ?Aorta This main artery from the heart carries oxygenated blood to allbody parts except the lungs. ?Pulmonary veins These veins transport oxygenated blood from the lungs back to the heart. ?Pulmonary artery The pulmonary artery transports deoxygenated blood to the lungs.
