Clean the Roof Rooftop Air Conditioner on Your Motorhome ...
Periodically (every 2 months for full time users, every 6 months for
seasonal campers), remove the return air filter located behind the
return air grille and wash it with soap and warm water, let dry and then
reinstall. Never run the unit without the return air filter in place. This
will plug the unit evaporator coil with dirt and may substantially
weaken the performance of the unit over time.

Clean your roof regularly. The debris, including fallen branches and leaves, provides a moist environment for moss and algae. It should be picked up, swept off, or blown off regularly to avoid facilitating the growth. Tackle the gutters too so that water drains freely. Prevention makes stain cleaning much easier later on.

into any ductwork as possible. Though there are a couple different brands and models of RV air conditioners, maintenance, and annual care is pretty much the same for all of them.

RV Air Conditioner Maintenance Must Do ' s

The condenser fins of your air conditioner should be free from bents and clean. The air conditioner coils should also be clean and not clogged with dirt or debris. Inspecting from the inside: Take a close look at the air filters, and make sure that they are clean. Dirty air filters can greatly reduce the performance of the RV air conditioning unit.
