NHS STANDARD CONTRACT FOR CLEFT LIP AND / OR PALATE ...

Cleft lip and cleft palate can often be diagnosed during pregnancy with an ultrasound exam. A cleft lip or palate can be successfully treated with surgery. This is often done in the first few months of life for cleft lip and before eighteen months for cleft palate. Speech therapy and dental care may also be needed.

Children which is a framework for uniformity of care provision 8. By the age of five years, the expectation in the non-cleft population is that the acquisition of speech sounds should be more or less complete 9.

The Cleft Care UK study. Part 4: perceptual speech outcomes
The Cleft Care UK (CCUK) study is a United Kingdom (UK)-wide cross-sectional study of 5-year-old children born with complete unilateral cleft lip and palate (cUCLP). 1
Recently reported findings from CCUK showed that outcomes in speech and dentoalveolar and facial form following treatment of cUCLP in the UK have improved since services were reorganized to a more centralized model of care. 2, 3
This reorganization of cleft services in the UK achieved a

A complete cleft of the secondary palate includes both the
hard and soft palate, extending anteriorly from the incisive
foramen to the uvula, and this can be bilateral as well (Fig.
54-4). The primary function of the palate is to separate the
oral cavity from the nasal cavity. This function is lost in the
presence of a cleft.
