Construct the dual for two of the three of the below linear programs (all three if this is your solution guide problem):  
 $\max 81 + 20r_2 + 43$  s.t.  $2x_1 + 3x_2 + 2x_3 < 20$   
 $\max 30x_1 - 2x_3$   
 $10x_4$  s.t.  $2x_1 - 3x_2 + 9x_4 < 10$

Operations Research - KSU

Operations research (British English: operational research) (OR) is a discipline that deals with the application of advanced analytical methods to help make better decisions. Further, the term operational analysis is used in the British (and some British Commonwealth) military as an intrinsic part of capability development, management and assurance. In particular, operational analysis forms ...
