Intertemporal Choices In Management Decision by

From choosing whether to spend one salary immediately or to put it into savings, whether to order candies now that may have health impacts later in life, or whether to postpone an unpleasant task until some future date, are just some of the ingredients of people behaviours engaging in what economics and decision theories describe as Intertemporal choice.

Intertemporal Choices in Management Decision Making

Intertemporal choice is the process by which people make decisions about what and how much to do at various points in time, when choices at one time influence the possibilities available at other points in time. These choices are influenced by the relative value people assign to two or more payoffs at different points in time. Most choices require decision-makers to trade off costs and benefits at different points in time. These decisions may be about saving, work effort, education, nutrition, e
