Read axles nut and suspension torque specs | Polaris ATV Forum
PhilCod. My 2012 800s, with aluminum factory aluminum rims was 30ft lbs + 1/4 turn. Be careful of the torque specs published for 2010 and 2011 800... it was stated at 90 ft lbs, the stud will break at that high of torque... I think the manual had a mis print and was corrected in 2012.
