Top 10 considerations when validating an autoclave

The Validator sterilizer will perform a self diagnostic test on eight key components. Start the check by depressing and holding the START/CLEAR switch while you depress, then release the POWER switch. The sterilizer will beep once, indicating the beginning of the self-diagnostic procedure. Use the table below for description of tests.

YOUR GUIDE TO MAINTAINING - Rpi

There are two main types of autoclave validation equipment- a wired sensor system that involves the use of thermocouples or the use of dedicated data loggers for sterilisers. The Kaye equipment has long been associated with thermal validation in the pharmaceutical manufacturing industry, so reliable is the Kaye Validator 2000 that it is sometimes specified in SOP's. We support the full range ...
